YIYIGROUP

Industrial Water Cooling Portable Air Cooler Fan

01 | Louver Outlet

03 | Caster Wheel

02 | Dustproof Net

04 | Tank intake

Efficient Water Cooling Technology: Utilizes advanced water cooling to provide rapid and effective temperature reduction, ensuring a comfortable environment.

High Airflow Capacity: Engineered to deliver substantial airflow, making it ideal for cooling large industrial and commercial spaces.

Portable Design: Equipped with sturdy wheels and a lightweight frame, this cooler can be easily moved to different locations as needed.

Energy-Efficient Operation: Designed to consume less energy while providing powerful cooling, helping to reduce operational costs.

User-Friendly Controls: Simple and intuitive controls make it easy to adjust settings for optimal cooling performance.

Experience superior climate control with our industrial water cooling portable air cooler fan. Designed to deliver powerful and efficient cooling, this portable air cooler is perfect for large industrial and commercial spaces. Its water cooling technology ensures effective temperature reduction, while the portable design allows for easy relocation to any area in need of cooling.
