

Red Green Traffic Signal Light

Easy to replace

The light plate card type traffic light is safer to protect against electric shock

A variety of options

- **Security maintenance**

Bayonet type flexible shield edge, no rust, no oxidation, rebound is not easy to deformation. No tool installation, high altitude work more convenient.

- **Flexible and strong**

Transparent mask of the same material as riot shield, thin and high permeability impact resistance. A variety of patterns to choose from without a quick experience.

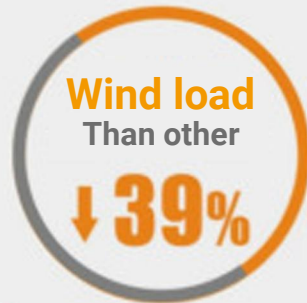

- **Security maintenance**

The luminous unit adopts safe waterproof pair wiring, corresponding to the same color, thread reinforcement, double protection, waterproof grade :IP65

Compared to traditional signal lights

Strong against typhoon

With a circular design, less material is used and less carbon is emitted

Red: Traditional traffic lights

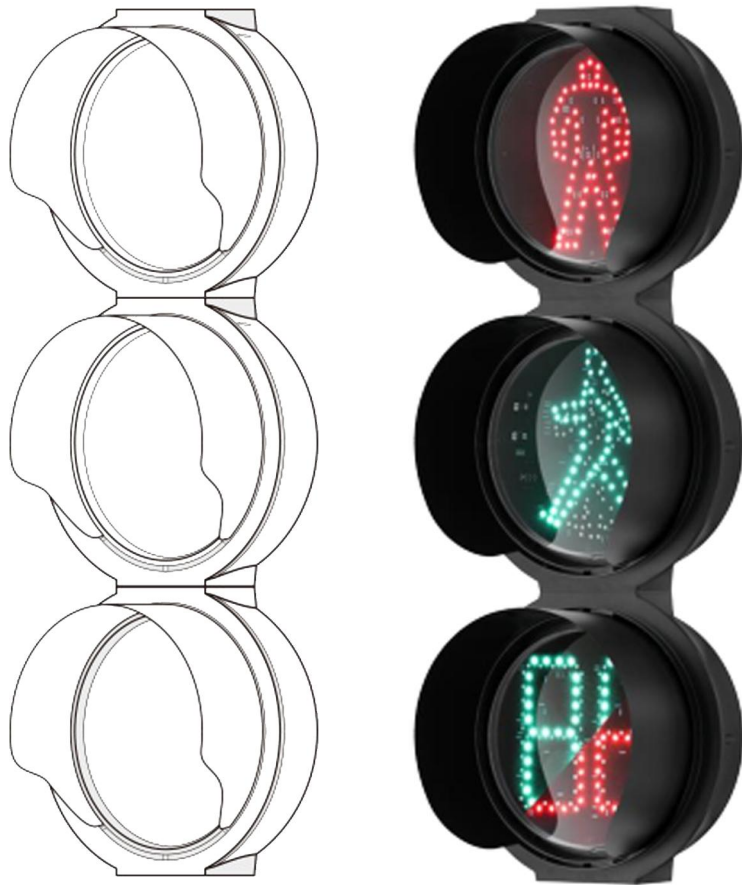

Black: Road traffic lights (aluminum)

Product introduction

Luminous unit	Φ300mm
Shell material	Engineering plastics / die-cast aluminum
Product weight	About 5.4 KG
dimension	1105*385*150mm
Package size	1155*430*310mm
Power source	Constant current power supply
Operating voltage	AC 176V - 264V
Operating frequency	48HZ ~ 52HZ
Insulation resistance	≥500MΩ
Operating temperature	-40°C - 80°C
Class of protection	IP53
Service life	>50000h
Vibration resistance	Meet the requirements
Wind pressure resistance	Meet the requirements
